## DETAILED ACTION

### *Election/Restrictions*

Claims 9-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 03/31/2005.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7-8 and 29-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder et al. [US 4,095,205].

Schroeder et al. discloses a layer insulation system [figure 2] for an oil filled environment comprising:

- a plurality of insulating units [42], each of the plurality of insulating units comprising first and second layers of insulating material

at least one of the first and second layers comprising a polymeric material, the insulating units positioned with respect to each other such that the second layer of one insulating unit adjacent to the first layer of another insulating unit, wherein the polymeric material is polyethylene terephthalate.

wherein the plurality of insulating units terminates at a terminal layer having thereon a third layer [44] of paper insulating material.

Art Unit: 2832

wherein the thickness of the layers from about 0.5 mil to about 20 mil.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schroeder et al. in view of Fujita et al. [US 4,096,313]

Schroeder et al. discloses the instant claimed invention except for the first layer comprises a paper insulating material and the second layer comprises the polymeric material.

Fujita et al. discloses insulation system for oil filled environment comprising first and second layers [A, B], wherein the first layer comprises insulating paper and the second layer comprises polypropylene material.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use material of insulating system of Fujita et al. in Schroeder et al. for the purpose of enhancing strength.
